

# Are you harnessing the full potential of your people?

Want to build a high performing team?

Want to move from co-operation to collaboration?

Want skills to be harnessed individually & collectively?

*"Alone we can do so little, together we can do so much"* - Helen Keller -

Our **Team-Building Programme** is designed to improve the performance of specific teams. It builds on the foundation workshop of our **MasterMind Programme** that provides an overview of how our brains function. It offers an engaging and enjoyable approach focussing on different elements of the team:

## **Individual**

We offer a range of options to explore the strengths and challenges of individual team members. The recommended option will depend on the objectives of the business and the team.

## **Relationships within the Team**

We explore the impact of different individual styles on the performance of the team and identify ways to overcome any gaps or challenges

## **Team as a Whole**

We develop a collaborative team charter that defines the ground rules for working together to achieve the best outcomes

*"When it is fun, you work harder. When you work harder - you get better"* - Eddie Jones, England Rugby Coach -
